PROFESSIONAL SUMMARY

Full-Stack Developer with 6+ years of professional experience building scalable, API-driven web applications using Laravel, Vue.js, and modern JavaScript/TypeScript. Adept at end-to-end development, from clean, test-driven code to frontend SPA implementations. Proven ability to mentor junior developers, lead technical discussions, and bridge communication between technical and non-technical stakeholders. Experienced in architecture decisions, system updates, CI/CD pipelines, and DevOps practices. Passionate about continuous learning, technical excellence, and aligning solutions with business goals.

TECHNICAL SKILLS

Backend: PHP 8, Laravel (8/9/10+), REST APIs, OAuth2, JWT, RBAC, Microservices

Frontend: Vue.js (2/3), JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3/SASS, Bootstrap

Database: MySQL, MariaDB, Query Optimization, Migrations

DevOps & Tools: Git/GitHub, GitHub Actions, CI/CD, Docker, Postman, PHPUnit, Laravel Pint

Testing: Unit & Integration Testing, Code Review, QA Collaboration

Other: Livewire, jQuery, Blade, Policies/Gates, Middleware, Job Queues

Bonus Exposure: AWS (S3, EC2 basics), Coinbase Commerce API, Remita Gateway, Blockchain wallet APIs

PROFESSIONAL EXPERIENCE

Afrifunders Startup Studio, Lagos — Senior Laravel & Full-Stack Developer / Engineering Manager

June 2023 – Present

- Led a cross-functional team of developers, designers, and QA analysts through full SDLC for fintech and SaaS platforms.
- Built scalable microservice APIs and integrated crypto/fiat payment gateways using Laravel Passport & OAuth2.
- Delivered frontend SPA components in Vue.js, ensuring seamless collaboration with designers.
- Conducted peer code reviews, pair programming, and mentorship for junior developers.
- Defined coding standards, implemented CI/CD pipelines with GitHub Actions, and enforced code quality via Laravel Pint & PHPStan.
- Facilitated technical discussions, architecture design decisions, and release planning, growing into Technical Lead responsibilities.

DigitCode Ltd, Lagos — Laravel / PHP Full-Stack Developer

Jan 2021 – May 2022

- Built multiple Laravel + Vue.js applications (CRMs, dashboards, and internal tools).
- Refactored a large-scale e-commerce backend, improving query performance by 40%.
- Partnered with UI/UX designers to translate prototypes into functional SPAs.
- Developed REST APIs and tested with PHPUnit/Postman, ensuring maintainable backend services.
- Mentored junior developers on Git workflows, migrations, and best practices.
- Contributed actively to Agile ceremonies (sprint planning, retrospectives, daily stand-ups).

SELECTED PROJECTS

- ERP System (Laravel + Vue.js + MySQL): Modular ERP with HRM, payroll, invoicing, inventory, and role-based access.
- University Payment Portal (Laravel + Remita API): Secure fee payment system with webhook validation and reporting dashboards.
- Digital Business Card (Laravel + Blade + QR Code API): Customizable vCard platform with appointments and social links.
- Ride-Hailing App (Laravel + Google Maps API): Real-time geolocation, trip tracking, and fare calculation APIs.

EDUCATION

University of Ibadan, Nigeria — M.Sc. Computer Science

KEY STRENGTHS

- Full-stack expertise across Laravel, Vue.js, PHP 8, and MySQL
- Strong collaboration with designers, QA analysts, and stakeholders
- Experienced in code reviews, pair programming, and mentorship
- Leadership experience in task delegation, onboarding, and architecture planning
- Committed to continuous learning, emerging tech, and technical excellence
